LERNER AND GREENBERG, PA P O BOX 2480 HOLLYWOOD, FL 33022-2480			HANSEN, JAMES ORVILLE	
			ART UNIT	PAPER NUMBER
			3637	

DATE MAILED: 11/10/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/816,374	BECKE ET AL.	
	Examiner	Art Unit	
	James O. Hansen	3637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 September 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) 7,8,15 and 16 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6,9-14,17 and 18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 15-16 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The examiner has taken the position that claims 15-16 read on a non-elected species in accordance with applicants withdrawal of claims 7-8 in the response filed December 27, 2004.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 15-16 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2 & 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Olsson [U.S. Patent No. 3,220,558]. Olsson (figures 1-6) teaches of a storage compartment for a refrigerator door, the compartment comprising: a box-shaped body (316 along with 14 for example) having a longitudinal wall (318b) and a given depth;

Art Unit: 3637

and a compartment divider (319) attached to the wall and extending over more than half of the given depth (fig. 6), the divider defining a chamber (at areas 22) capable of holding small items. The divider being capable of extending substantially entirely over the given depth (note fig. 1 for example). The compartment having at least one sidewall (see notched sections of the sidewall – fig 1.) with a concave shape (top of the notch) in a direction of the given depth. The chamber having an open base (note fig. 3). The divider having a given height that is less than that of the box-shaped body (when not attached to the body).

4. Claims 1-3 & 6 are rejected under 35 U.S.C. 102(b) as being anticipated by European publication 611,930 [EP'930]. EP'930 (figures 1-5) teaches of a storage compartment for a refrigerator door, the compartment comprising: a box-shaped body (2 – fig. 1) having a longitudinal wall (5) and a given depth; and a compartment divider (11) attached to the wall and extending over more than half of the given depth (fig. 2), the divider defining a chamber (23) capable of holding small items. The divider being capable of extending substantially entirely over the given depth. An extent of the divider in a direction of the given depth of the body being greater than in a width direction. The divider having a given height that is less than that of the box-shaped body (note rear wall for example).

5. Claims 1-6, 9-14 & 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by German publication 9014463 [DE'463]. DE'463 (figures 1-4) teaches of a storage compartment for a refrigerator door, the compartment comprising: a box-shaped body (20) having a longitudinal wall (rear wall 24) and a given depth; and a compartment divider (31) attached to the wall and extending over more than half of the given depth (fig. 6), the divider defining a chamber (on each side of the divider)

Art Unit: 3637

capable of holding small items. The divider being capable of extending substantially entirely over the given depth (note fig. 2 for example). An extent of the divider in a direction of the given depth of the body being greater than in a width direction. The compartment having at least one sidewall (note the sides of the divider near the section where part 31 and part 22 meet) with a concave shape in a direction of the given depth. The chamber having an open base (note fig. 2). The divider having a given height that is less than that of the box-shaped body (fig. 4). The divider having a rider (downward portion – element 23) extending downwardly spaced from a wall thereof (top wall portion) located adjacent to a slot (25) extending vertically within the longitudinal wall (see fig. 4), for holding the divider attached within the body. The slot and the rider are sized to form a friction lock between the rider and walls of the body defining the slot as readily apparent to the examiner, and wherein the divider is defined by four connected walls (back wall, 2 curved side walls, front wall) which do not extend to a bottom of the body to define the chamber.

6. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Japanese publication 2001-116439 [JP'439]. JP'439 (figures 1-5) teaches of a storage compartment for a refrigerator door, the compartment comprising: a box-shaped body (2) having a longitudinal wall (either front or rear wall) and a given depth; and a compartment divider (3 or 4) attached to the wall and extending over more than half of the given depth (fig. 3), the divider defining a chamber (two chambers shown) capable of holding small items. The divider being capable of extending substantially entirely over the given depth (note fig. 2 for example). An extent of the divider in a direction of the given depth of the body being greater than in a width direction. The compartment having at least one sidewall (note the two sides of the chamber for example) with a

Art Unit: 3637

concave shape in a direction of the given depth. The chamber having an open base (note fig. 3). The divider having a given height that is less than that of the box-shaped body (fig. 3).

Response to Arguments

7. Applicant's arguments filed September 8, 2005 have been fully considered but they are not persuasive. In response to applicant's remarks concerning the applied prior art references note the following. The position is taken that the cited references adequately address the claimed limitations as structurally set forth. As to the characterization of the terms "depth" and "chamber" within the body, the examiner notes that the dimensional direction of "depth" is being viewed as the direction from a front of the body to a back of the body. A "width" direction would be viewed as the direction from side to side of the body, while a "height" direction would be viewed as the direction from a bottom to the top of the body. As such, the characterization of "depth" within the claims is believed to have been met by the references. As to the "chamber" recitations, it is viewed that the references each depict a "chamber" in as much as applicant's embodiments depict the claimed feature, in view of how the "depth" limitation is being interpreted [when comparing a top view of fig. 7 with top views of the prior art references].

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3637

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James O. Hansen whose telephone number is 571-272-6866. The examiner can normally be reached on Monday-Friday between 8-4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on 571-272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
